

Overview

A global pharmaceutical enterprise required a transformation of its integration landscape to support secure, scalable, and always-on operations across more than 100 countries.

Legacy integration systems were limiting visibility, increasing incident rates, and slowing down troubleshooting. The objective was to establish a resilient, compliant, and AI-ready integration ecosystem.

About Client

Global Pharmaceutical and Diagnostics Leader

A Swiss multinational healthcare organization with over a century of innovation, focused on delivering advanced medicines and diagnostic solutions to address complex global healthcare challenges.

Business Challenge

The organization needed to modernize its integration framework to:

Ensure enterprise-grade security and regulatory compliance

- Achieve high availability for mission-critical systems
- Improve observability across distributed integrations
- Reduce production incidents and manual troubleshooting efforts
- Enable a scalable and future-ready architecture

Our Solution

A modern API-led integration architecture was implemented using MuleSoft Anypoint Platform:

- API-led connectivity for scalable and reusable integrations
- OAuth 2.0 authentication with strict policy enforcement via API Manager
- Centralized error handling with structured logging
- Real-time monitoring enabled through Splunk and AppDynamics
- Fault-tolerant architecture ensuring continuous operations

Technology Stack

- MuleSoft Anypoint Platform
- MuleSoft API Manager
- OAuth 2.0 Authentication
- Splunk
- AppDynamics

Result: Measurable Outcomes

- 75% reduction in production incidents
- 85% increase in system observability
- 50% reduction in troubleshooting time
- 99.9% availability across business-critical systems

AI-First Integration Strategy

The modern integration foundation enables the organization to transition toward AI-driven operations:

- Predictive detection and prevention of system failures
- Intelligent automation of integration workflows
- Real-time, data-driven decision making across global operations

Agent Marketplace: Pharmaceutical Innovation

Access a centralized AI Agent Marketplace where organizations can explore, select, and deploy agents based on their specific business needs. MuleSoft enables seamless integration of these AI agents across systems, making pharmaceutical operations more proactive, efficient, and scalable.

Netsmartz AI Agent Marketplace Highlights

Use Ready-Made AI Agents

Deploy pre-built agents to automate monitoring, compliance, and operations.

Build and Monetize Your Own AI Agents

Create and publish custom agents to generate recurring revenue.

Turn AI Innovation into Revenue

Monetize AI solutions built on your integration ecosystem.

Continuous Innovation Without Rebuilding

Add new AI capabilities without changing core systems.

Why Envision

- Deep domain expertise in MuleSoft and API-led integration architecture
- 24x7 dedicated support by MuleSoft-certified engineers
- Subject matter experts in enterprise and B2B integrations
- Cost-optimized engagement models and efficient resource utilization
- Expertise in ensuring security, governance, and regulatory compliance
- Specialized expertise in MuleSoft implementation and integration strategy

About Envision

Envision, a **Netsmartz** company, unlocks the full potential of **MuleSoft** for businesses of all sizes and across industries. As a one-stop shop for **MuleSoft** implementation, support, and services, we empower you to streamline integrations, enhance data connectivity, and achieve operational excellence.

Our team of experts is well-versed in **MuleSoft Anypoint Platform**, API-led connectivity, and enterprise integration strategies across industries such as healthcare, manufacturing, and more. Let **Envision** be your trusted partner in building a scalable integration ecosystem and driving seamless digital transformation.
